# Why Work With U.S. Water?

## EXPERT TECHNICAL SUPPORT GROUP:

Expert-level treatment plant operators available 24/7 to support on-site operations teams with training, process control, O&M Manual preparation, and preventative maintenance plans. With most team members possessing >35 years of industry experience, their expertise is unparalleled.

## READILY-AVAILABLE ON-STAFF RESOURCES:

Trained operators licensed in multiple states and disciplines and a full complement of experienced maintenance technicians who are readily available to support operations. Our staff includes industry subject matter experts and easy access to engineering support when needed.

## SELF-PERFORM MAINTENANCE TEAM:

In-house team of 45+ skilled tradesmen who travel to support projects nationwide and excel in providing maintenance services, troubleshooting mechanical, electrical, and controls issues, and conducting corrective repairs and upgrades specifically for industrial treatment systems.

## COMMITTED TO SAFETY:

Safety is our top priority at U.S. Water and we maintain a steadfast commitment to a safety culture ensuring the well-being of our employees and stakeholders. Our comprehensive safety approach, aimed at preventing all safety incidents, consistently yields safer outcomes on our project sites.

## INNOVATIVE PROCESS CONTROL & MONITORING (PC&M<sup>SM</sup>) SYSTEM:

Proprietary web-based system designed to collect, monitor, and display critical operating parameters tailored to specific treatment systems. PC&M<sup>SM</sup> provides instant feedback and customized reports and reduces labor while enhancing efficiency and asset reliability.

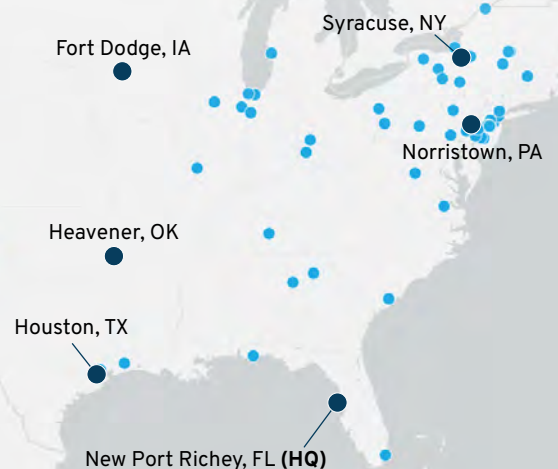

## INNOVATIVE TOOLS:

Clients see enhanced performance and efficiency through our use of innovative tools, like PC&M<sup>SM</sup>, SDS Tracker (accurate safety data sheets), MPulse (best-in-class computerized maintenance management system), and Predictive Index (an advanced screening tool used to hire effective staff).
